

Five Reasons to Love Park Turf in the Spring

Written by Juanita Leatham

Spring is a time of renewal and are all spending more time outdoors. Kids and pets want to play and have fun, people are having barbecues and parties, and of course, it's wedding season! Here are 5 reasons park turf is beneficial during the spring time.

- **It's safe and non toxic for children to play on.** From baby's first steps to playing sports with friends, they won't be around unsafe toxic pesticides that would be around if you had to maintain a lawn with grass. There are no dangerous rocks, pebbles, or bugs for toddlers of crawling or curious age to pick up and eat. Park turf is perfect for parks, recreation areas, day care centers, nurseries, and schools.
- **Pets and pet owners love it.** Our park turf is easy to clean up after pets. It's safe for pets of all ages, from rambunctious puppies all the way to senior dogs. Ditch the holes from digging, scratching, and playing. Make washing pets and messes easier without the ground getting muddy with paw prints. Dog parks, animal boarding, pet shops, animal grooming shops, and pet owners would be smart to get artificial park turf.
- **Allergy friendly and mold resistant for the spring.** Grass is known to make people get itchy skin, rashes, watery eyes, sneezing, and a runny nose. If you suffer from seasonal or chronic allergies to grass or pollen please consider this park turf as a long term prevention to your allergies. You won't have to wait for it to grow, you won't have to buy expensive sod, and your yard will be weed free.
- **It eliminates mud and weeds.** Say good bye to unsightly crabgrass, holes, and browning. Give your business or yard a makeover. Artificial grass gets rid of costly year round landscaping while also maintaining a consistent and clean look. Save time and money. Get out and enjoy the outdoors while you're not mowing the lawn. Also, don't worry about tracking in undesirable messes from the front and back yard. This is a cost effective and environmentally friendly, is low to no water usage, and a great solution to water conservation during times of drought. Great decoration to any area, any size, for a uniform clean look. Best for use in outdoor spaces big or small. Versatile use in parks as alternative to unsanitary and gritty sand, noxious plastic rubber, itchy grass, and hard concrete.
- **Bugs don't have a home to thrive in.** The dirt from the ground is blocked and separated safely away from your path. When it's wet it easily drains through to the other side. Low maintenance, environmentally friendly, and no reason to use bug spray. It's great to use for all seasons. It keeps ground bugs away from your loved ones and keeps pesky bugs away from guests at your next dinner or business party.

Leave winter in the past, spring is for living life to it's fullest! Have a barbecue or a backyard party to show off your new landscape after it's installed. Please contact us if you want to get more information about an estimate, pricing, sizing, or the many other benefits of having artificial grass.
